

The graph displays two data series over time from 1990 to 2019. The red line represents the total number of people in the labor force, which starts at approximately 10.5 million in 1990, rises sharply to a peak of about 15.5 million in 2000, and then declines to around 11.5 million by 2003. It remains relatively stable until 2008, after which it shows a slight upward trend, peaking again around 12.5 million in 2014 before a small dip in 2019. The teal line represents the number of people in the labor force with a job, starting at approximately 8.5 million in 1990 and showing a consistent upward trend, reaching about 12.5 million by 2019. Both lines are plotted against a light gray background with a white grid.
